

ABOUT US (PT. DIGITAL INDONESIA)

Digindo, founded in 2009 by a group of creative people that produces lasting results for their clients. Digindo stands for style and class. Many national and international design are in the Digindo portfolio.

Together with you, our partner, we look forward to forging a unique identity, an exciting brand concept or an eye-catching products.

Digindo merges art, design, information & technology into an exciting new communication concept. We do this in close consultation with our partners – because brainstorming is what we are good at. Each project requires a detailed analysis and a fresh approach – the only way to stimulate those extra creative impulses!

In 2016 we create our self Commercial Interiors Division that is called Tingkat. Tingkat will attach great importance to 'craftsmanship', but also to service and prompt delivery. Our past partners – whether they be the government, trend-setting companies or even private individuals - have always been appreciative of our professional dynamism.

Our team is both close-knit and ultra-professional. And we are not merely interested in form – content and meaning are just as important. Everything that we do has a strategic purpose. You want an original design, tailored to your needs? Tingkat will pulls out all the stops for your project, with a unique design.

DESIGN

We believe that creating a wonderful home for you is not merely about spectacular interior designs. It is about knowing and understanding each of our client's characters, needs and dreams. We strive to provide personalized design, high quality furnishings and comfort at your dream home. Creating inspiring, functional, branded businesses is the goal of our full-service design offerings.

CASE WORK

Just like the clothes you wear and the music you listen to, your space is an extension of you. The best projects tell visual stories that have layers of past and present, unexpected elements not from one particular style or era and are often counter-intuitive but have a familiarity that is real. In short, they are the visual biographies of your life. Just as you aren't one dimensional, the place you live, work or sell your wares shouldn't be either.

CONSTRUCTION

We give the concept in your mind visible quality: as the general contractor, we monitor all subcontractors in terms of timing, clarify building regulations and ensure that deadlines are met as required. Whether it's dry construction, floor coverings, painters, architectural engineering, or facades – we know what's important and demand the highest on-time service from the service providers involved.

CASE STUDY MEDIKA BSD HOSPITALS

Medika BSD Hospital located in downtown of BSD City, Serpong, Tangerang. Occupying an area of 12,000 m², Medika BSD Hospital building consists of seven floors, a hospital that offers comprehensive health services.
